

# Cite 2012 ORLANDO APRIL 10-13

Create. Innovate. Collaborate.

Mark your calendars now to attend this thought leadership event dedicated to the use of technology in education! This annual event brings together more than 500 higher education online learning program executives, faculty and administrators to share in the discussion and exchange of information on innovative learning strategies across a broad range of education programs. Learning opportunities throughout the conference range from best practices for creation of online courses and/or programs, ideas for education innovation and insights into collaborative learning.

## Past conference topics have included:

- Usage of social learning tools
- Strategies for assessment and analytics reporting
- Content creation
- Unique uses for digital repositories
- Synchronous learning best practices
- Learning outcomes creation and implementation
- Collaborative teaching methodologies

# Cite 2012 ORLANDO

## APRIL 10-13

Create. Innovate. Collaborate.

### Keynote Speakers

---

#### **Mark Milliron**

*Deputy Director of Postsecondary Improvement,  
Bill and Melinda Gates Foundation*

Former Deputy Director for Postsecondary Improvement with the Bill and Melinda Gates Foundation, Dr. Milliron is also the founder of Catalyze Learning International. He is an award-winning leader, author, speaker, and consultant well-known for exploring leadership development, future trends, learning strategies, and the human side of technology change.

#### **Marilee J. Bresciani, Ph.D.**

*Professor of Postsecondary Education Leadership,  
San Diego State University*

Dr. Bresciani's research focuses on the evaluation of student learning and development. She uses grounded theory to explore how systems and processes contribute to student learning centeredness, which includes the study of leaders' roles in these systems and processes.

#### **Dr. John J. Medina**

*Author, "Brain Rules: 12 Principles for Surviving and Thriving  
at Work, Home, and School"*

Dr. John J. Medina, a developmental molecular biologist, has a lifelong fascination with how the mind reacts to and organizes information. His provocative New York Times bestselling book takes on the way our schools and work environments are designed.
