

## **FOR OUR READERS:**

With our February Issue, we will introduce a section in Ed Magazine, **THE STATE EXCHANGE 2000**. This will focus on activities, proposed legislation, successes and caveats experienced by members of USDLA State Chapters. If a reader who is not a member of the State or National USDLA would like to contribute to **THE STATE EXCHANGE**, your views and experiences also will be most welcome.

In February 2000, we will introduce **THE TECHNOLOGY EDUCATION EXCHANGE**. Here we will highlight existing and proposed new partnerships and models for active collaboration between communications industries and education, local, state, or national, K-graduate school. We will also reference some newer technologies that we feel may hold exceptional promise in meeting the needs of school/training environments. If you are working with technologies that you would like us to review for inclusion in **TECHNOLOGY EDUCATION EXCHANGE**, either as a manufacturer or user, please send information and press releases to the address above.
